What a wonderful world

When God shows off, He leaves us speechless!

Imagine being on a small boat, quietly fishing...

And suddenly a 40-foot 80,000 pound humpback whale bursts from the ocean just feet away.

Off the coast of California's Monterey Bay, photographer Douglas Croft captured this incredible moment, reminding us how truly magnificent God's creation is.

Did you know humpback whales feed using a method called "bubble netting"?

They work together, blowing bubbles to form a net of air.

They gather fish in their air net and then they eat them up to sustain their massive bodies. Extraordinary proof of God's divine design!

Next time life feels ordinary, remember:

- Pause and marvel at God's creation around you.

Appreciate the small blessings hidden in your daily routine.

- Trust that if God can guide whales to provision, He will surely guide you, too.

Today, embrace awe and let God remind you just how big and beautiful this life really is!
